Expo site layout released

The Expo site layout for the biggest forestry and timber expo in the Southern Hemisphere - AUSTimber 2012 – is now available for viewing on the AUSTimber 2012 website www.austimber2012.com.au

The site has been finalised with positive input after site inspections from a number of local, national and international exhibitors.

AUSTimber 2012 is the biggest forestry and timber expo in the Southern Hemisphere integrating softwood and hardwood plantations. The Expo will be held over two days 30th and 31st March 2012 delivering a dynamic environment to experience the latest in precision forestry technology with live demonstrations, indoor and outdoor displays. The Conference will be held on Thursday 29th March 2012 in Mount Gambier city with the theme 'Precision Forestry in action'. The conference will provide an opportunity to hear from experts – Australian and international – on all issues facing the future of forestry from seed to end markets, the whole supply chain.

“The planning and layout is first class I would say it is probably the best forum in which to do this in the southern hemisphere. The site plan is well laid out, with very good space and variety. There is plenty of Plantation Eucalyptus and also some decent sized Radiata Pine clear-fall and thinning blocks on site, which gives all suppliers a good variety to showcase our different harvesting systems and machinery. The layout will be very good for our customers, who will be able to easily traverse from static through to active sites” said Glen Marley, District Manager Australasia & South East Asia, Tigercat Industries Inc.

About AUSTimber 2012 www.austimber2012.com.au

AUSTimber 2012 is the biggest forestry and timber expo in the Southern Hemisphere integrating softwood and hardwood plantations. AUSTimber 2012 will showcase the latest in technology, machinery, products and services for the industry.

AUSTimber 2012 will be conducted in a single location in the forest, only 15kms North of the city of Mount Gambier, the centre of the largest plantation forest area in Australia. The Expo will be held over two days 30th and 31st March 2012 delivering a dynamic environment to experience the latest in precision forestry technology with live demonstrations, indoor and outdoor displays.

The Conference will be held on Thursday 29th March 2012 in Mount Gambier city with the theme 'Precision Forestry in action'. The conference will provide an opportunity to hear from experts – Australian and international – on all issues facing the future of forestry from seed to end markets, the whole supply chain.
